Description

This is our most economical high side utility trailer in a 7000# GVW. This is a great value for a entry level tandem axle utility landscape trailer. Ideal trailer for someone doing occasional use, around the house, small equipment (ATV, garden tractor, golf cart, or similar). Not recommended for commercial users (yes, we're talking to you, landscapers!) or compact tractors. While it is our most economical, it does have some features others at this price point do not, including:

- 2 5/16" A-frame coupler (not a 2")
- 4' Tube steel gate (Many use angle iron, which can't carry as much weight as it flexes more)
- Structural channel tongue (not angle iron or lighter duty formed C-channel)
- E-Z lube hubs (Makes bearing maintenance a breeze, 10 minutes, 1 time a year).
- Full size 15" radial tires (Not 14", bias, hybrid, etc)
- EZ Gate (Pinless gate removal... no tools required)
- Sandfoot on jack (doesn't allow it to sink into the dirt/gravel, etc. where you'd need to constantly lift out of the ground to hitch up)
- Brakes on both axles (not required in all states, but we do it on all of ours)
- 6.5' width (Ideal for those desiring enough width to load most objects, but not as wide as a full 7' trailer)
