Description

ALUMINUM RAIL SIDE UTILITY

The Aluminum Rail Side is your lightweight workhorse. It includes full LED, DOT compliant lighting, square tube top rail, stake pockets, aluminum wheels, and #1 grade, treated wood flooring. It is easy to load and easy to move, making this an easy choice for your next utility trailer purchase. The extended length ramp allows loading lower profile items with ease, and the bi-fold, fold flat ramp makes towing it a breeze! Standard aluminum wheels give it good looks, tubular triple tube aluminum tongue and 2x2" tube top rail add strength and rigidity. Aluminum utility trailers tend to weigh about 70% of it's steel counterpart, shaving about 300# off the empty weight of the trailer. It's light enough to tow even with most uni-body SUV's, and move by hand with the standard swivel jack with caster wheel. Slimline LED's give it some additional style while fender gussets give some additional strength to the stylish radius fenders.
