From the Manufacturer...

Our CC equipment hauler is the ideal choice for users wanting a mid-range tool for transporting all sorts of mid size equipment (large compact tractors, small to small/mid size bobcat), etc. Each of our equipment hauler trailers is built on a 5" channel frame and tongue, to provide the best balance of strength and weight. Standard configuration is with a straight deck and wrap tongue. Crossmembers on this unit are 3" structural channel. Dovetail options are also available. A three year frame warranty is standard. EZ-Lube axles are standard features, and are suspended with a leaf spring suspension system. Axle maintenance is fast and easy with the centrally located grease fitting. Each Heavy Duty Utility trailer ships standard with a 15,000 pound RAM cast 2-5/16" adjustable coupler and a 7,000 pound RAM drop leg jack. 15" 8-ply Provider radial tires and wheels are also standard. And loading your trailer is easy, thanks to the included 5' stand up deluxe ramps with spring assist. The drive-over fenders on our equipment hauler give you the versatility to load vehicles up to 102aAA in width. We floor each trailer with individually certified 2" Southern yellow pine boards. Stake pockets on either side serve as versatile tie downs. Our equipment hauler trailers includes lifetime-warranty LED lights as standard, as well as a -65F arctic wiring harness. We also sandblast each trailer prior to applying an industrial grade IFS powder coat with a one-year warranty. We build each equipment hauler to meet DOT and NATM standards, right down to the reflective tape. This ensures you have the safest trailer possible behind your towing vehicle.
