Description

This is our most economical wood deck car hauler we offer. While it is our most economical, it does have some features others at this price point do not, including: * 2-axle brakes (not all states require it, PA does) * Removable fenders (allows door to open on lower vehicles, side loading of material, and easier for replacement if needed) * 15" radial tires (not 14", bias, or hybrid) * Full wrap channel frame (some will stop at the first or second crossmember) * Channel frame (some use angle iron frames, less twist/flex in channel) * 2' beavertail (better loading angle, some economy models are a straight deck limiting what you can load)

- Stacked channel over channel tongue/frame (some use a single monoframe, which is lighter weight, and not as strong in the 6-7' between the front spring hangar and the front corner of trailer) where a stacked frame has twice the framing) * 10 tie downs (some only have 4, more tie downs = more flexibility) * Forward adjusting brakes (Brakes self adjust forward, similar to a car, bringing added piece of mind) * LED light upgrade (LED's are proven to last longer and be more visible) * Fully adjustable ramps (ramps are able to load fully across the entire rear of the trailer, not just a portion of it. They can also be slid together for a single large ramp) For a walk around of the trailer, please use this link: https://youtu.be/V_L6hIv5ZF8
