Description

UNIT HAS UPGRADED STEEL FLOOR  
Watch a video walk around of this trailer here: <https://youtu.be/VHNR4oDjnu8>

This is our most economical steel deck car hauler we offer. While it is our most economical, it does have some features others at this price point do not, including:

- 2-axle brakes (not all states require it, PA does)
- Removable fenders (allows door to open on lower vehicles, side loading of material, and easier for replacement if needed)
- 15" radial tires (not 14", bias, or hybrid)
- Full wrap channel frame (some will stop at the first or second crossmember)
- Channel frame (some use angle iron frames, less twist/flex in channel)
- 2' beavertail (better loading angle, some economy models are a straight deck limiting what you can load)
- Stacked channel over channel tongue/frame (some use a single monoframe, which is lighter weight, and not as strong in the 6-7' between the front spring hangar and the front corner of trailer) where a stacked frame has twice the framing)
