Description

UNIT IS EQUIPPED WITH A 102" DECK UPGRADE AND DRIVE OVER FENDERS. THIS TRAILER IS A SOLID VALUE. IT'S ESSENTIALLY BUILT AS AN EQUIPMENT TRAILER, BUT HAS SLIDE IN RAMPS. FEATURES NOT TYPICALLY ON A 9990# CAR TRAILER, SUCH AS STRUCTURAL CHANNEL (NOT ANGLE IRON) FLOOR CROSSMEMBERS, REMOVABLE FENDERS, RUB RAIL, ETC. ALSO UPGRADED CHARCOAL POWDERCOATING, A 7K JACK, AND ADJUSTABLE COUPLER. A VERY CAPABLE AND SOLID CAR TRAILER FOR THE MONEY.

From the Manufacturer: The classic car hauler is your new best friend when it comes to vehicle transport. Built on a 5" channel frame and tongue, this trailer fills the gap between our economy and Road Runner models. Loading your car is easy, thanks to the included slide-in ramps and 2a dovetail deck. These removable ramps conveniently slide sideways underneath the trailer and are secured with steel hatches when not in use. Full length rub rail on either side provides plenty of options for tying down your vehicles. Dexter EZ-Lube axles are standard features, and are suspended with a leaf spring suspension system. Axle maintenance is fast and easy with the centrally located grease fitting. One electric

brake axle is included, with the appropriate wiring harness already installed. The arctic wiring harnesses on the classic car hauler offer 7-way plugs, and are fully insulated and enclosed to endure any weather condition down to -65 degrees F. LED lights come standard, and include a lifetime warranty. A 2" RAM coupler and RAM top wind jack make hitching up to your truck an easy task, and basic options allow you to configure your classic car hauler exactly the way you need it. We floor each of our classic car haulers with individually certified 2" Southern yellow pine boards, and cover the Provider radial tires with smooth plate fenders. Prior to receiving an industrial grade IFS powdercoat, the classic car hauler is sandblasted to remove impurities, oils and other contaminants that may cause an inferior finish. We build each classic car hauler to meet DOT and NATM standards, right down to the reflective tape. This ensures you have the safest trailer possible behind your towing vehicle.
