THIS TRAILER IS EQUIPPED WITH OPTIONAL EXTRUDED ALUMINUM FLOOR. HAS 6" CHANNEL TONGUE AND FRAME UPGRADE AND IS A POWER TILT.

ALUMINUM SPEED LOADER TILT CAR HAULER TRAILER

The H&H Aluminum Speed Loader Tilt Car Hauler trailer was the first of it's kind, helping to make your loading and unloading tasks quick and easy. The lightest and fastest loading trailer we offer. Push button electronic actuated hydraulics bring a bit of fun to the chore of loading and unloading. Value, exceptional design, and dependability are second only to the sheer beauty of this trailer.

Aluminum Car Hauler (Tilt Deck) - If you are tired of ramps, don't want a beavertail to catch on a driveway incline, have the occasional need to overhang a load, or prefer full width loading rather than narrow ramps, this tilt deck might be for you! It is available in both a manual and power tilt, and a 7000#, 9900#, and 14000#. The chassis is very similar to the flatbed car hauler model as it shares the same tongue/mainframe, and a fair amount of similar features. The trailer is equipped with a rubrail and stake pockets giving a virtually unlimited number of tie-down locations. The 6" channel full wrap tongue and massive 8" channel mainframe (same as the 14K GVW) make this a fairly rugged 9990# aluminum trailer - it surely won't win any awards for being lightweight. We also like the way the slimline lights and standard aluminum wheels give the trailer a tidy, sleek look. The removable fenders are well engineered for a quick and easy, yet secure deployment. H&H uses a 7000# drop leg jack standard, and has the newer style bullet LED lights. All in all, you're getting a tilt trailer for nearly the price of a aluminum car hauler with ramps, making it a solid value in this segment. The

7x18 7000# model weighs in about 1680#, leaving a net legal payload of approximately 5300# + tongue weight, or enough to haul most pickup cars, SUV's or small compact tractors. The ideal tow vehicle would be a 1500 series truck depending on what is being hauled, but could also be pulled by a handful of other vehicles including some SUV's. A trailer like this would make an excellent all around trailer for a homeowner with a car collection or hauling a compact tractor, auto repair, hauling a pair of UTV's, or similar.

FEATURES
